

## Bricks Break on Body at Shanghai Jiao Tong University, June, 2012

My Dear Students of Physics 101,

Kindly find below some photos of **Prof. Harry Swinney**, whom I told you about in class (I met him in 2012 in Shanghai). I put the photos in order just to let you feel engaged. Unfortunately, I do not have a video record of such nice moments that prove the idea "Physics works". However, you can check the following link to read that piece of news titled as "Bricks Break on Body at Shanghai Jiao Tong University" (You can also see me in the 1<sup>st</sup> photo (to the left) watching Harry being saved by the power of inertia).
